## About this sample

This document maps every adaptation in the programme onto the Education Endowment Foundation's adaptive-teaching framework. Use this as evidence for Ofsted preparation packs.

## The Five Strands — at a glance

### 1. Explicit instruction

Showing pupils exactly how to do the task — the method, the example, the answer. Not assuming they will infer it.

- Worked examples on the board
- I do, we do, you do

### 2. Cognitive and metacognitive strategies

Teaching pupils how to think in your subject — how to plan, how to check, how to remember.

- Self-check prompts ('is the answer roughly right?')
- Planning grids and sentence stems

### 3. Scaffolding

Temporary supports that let a pupil access the same task. Removed as skill grows.

- Sentence starters and writing frames
- Tiered worksheets — every pupil starts from a success point

### 4. Flexible grouping

Pairing pupils by complementary skills — not by overall attainment.

- Allocate roles explicitly in every group task
- Avoid 'ability tables' as a default

### 5. Using technology

Tools that reduce the load of handwriting, reading or recall — so pupils can focus on the thinking.

- Text-to-speech for long source texts
- Speech-to-text for pupils with dyslexia or dyspraxia
