About this sample

This is a text excerpt from the Module 1 presentation deck. The full deck is a professionally designed, fully scripted PowerPoint presentation ready for your SENCo to deliver.

The Eight Types You'll Meet Most

ADHD — Attention Deficit Hyperactivity Disorder

ASD — Autism Spectrum Disorder

Dyslexia — Reading, writing & processing

SEMH — Social, Emotional & Mental Health

Dyscalculia — Number & maths processing

SLCN — Speech, Language & Communication

DCD — Developmental Coordination (Dyspraxia)

MLD — Moderate Learning Difficulty

Deep Dive: ADHD — What it actually looks like

What you see in lessons:

- Can't stay in seat for long
- Calls out, interrupts
- Loses track mid-task

What the pupil is experiencing:

- Brain constantly searching for stimulation
- Impulses fire faster than thought
- Working memory fills up quickly

Common misconceptions:

- "He could do it if he tried"

- "She's just attention-seeking"

Deep Dive: Autism (ASD) — What it actually looks like

What you see in lessons:

- Resistance to changes in routine
- Minimal eye contact or social chat
- Very literal responses

What the pupil is experiencing:

- Processing the world differently
- Social 'rules' feel invisible and arbitrary
- Change = genuine threat, not preference
